

PAPER CONVERTOR

**PROVIDERS OF  
ENVIRONMENTALLY FRIENDLY  
WIDEST RANGE OF  
INDUSTRIAL PACKAGING PRODUCTS**

**DG PAPER CONVERTOR** is one of the leading manufacturers of High strength Fibre Drum and other packing material with an experience of over **25 years** in the industry. The core business activities of DG is centered at Kraft Paper Production and Conversion into various products.

With the experience of over 25 years and focus on continuous improvement, the group has progressed and gained total confidence of its customers to deliver reliable, cost effective and environmentally friendly products in a timely fashion. Today, DG serves its customers not only in India but also Neighbouring Countries, East African Countries and the Middle East.

Through our state-of-the-art manufacturing facilities and experienced personnel, we serve the needs of various industries that include Flexible Packaging, Electrical Insulation, Textile & Fabric, Printing & Publishing and Plastic Processing Industries, Chemicals, Pharmaceuticals, Food etc.

## ABOUT US

### OUR VISION

To become the **“Most Preferred Paper Packaging Product Supplier”** providing sustainable packaging solutions to customers across various industry segments.

### OUR MISSION

We aim to be one of the top 10 Paper Packaging Solutions Provider in India within the next 5 years.

To always exceed customer expectations in quality, cost and supply through continuous improvement, high manufacturing standards and customer interaction.

### OUR VALUES

- Act with honesty and integrity.
- Treat people with respect.
- Conduct all business lawfully.
- Accept individual and corporate responsibility.
- Strive for customer satisfaction.
- Improve and innovate continuously.
- Never be wasteful.
- Always work effectively and efficiently.

## **FIBRE DRUMS**

**DG PAPER CONVERTOR** has come with Totally Eco-Friendly innovative solutions to meet the packaging needs of the pharmaceuticals, chemicals, bulk drugs, foodstuff & various other industries. The Fiber Drums come in various sizes from 6 to 22 inch diameter and from 8 to 85 inch height for volumes ranging from 5 litres to 300 litres.

The Fibre Drums also come in various inner and outer surface finishes including poly laminated kraft, plain kraft, aluminium foil lined, waxed coated, white, black, coloured and printed. Special water resistant Fiber Drums and other as per customer specifications for export packaging of dyes and intermediates, bulk drugs, etc. can be tailor made. Backed by the groups own paper and board manufacturing mills, great consistency in quality and supplies is maintained.

## **WHY USE FIBRE DRUMS?**

Fibre drums are an easy-to-handle, durable, value-for-money alternative to plastic or steel barrels. Their performance in safely protecting valuable products in storage and transport has been proven over decades.

They are also a sustainable choice. Using fibre instead of plastic or steel containers contributes to a low-carbon, circular economy in numerous ways.

Fibre drums are light-weight, offering health and safety benefits in the workplace; and lower transport costs. Yet, they are robust enough to meet the demands of the most difficult supply chains. Internal and external liners can be added, to increase their versatility and performance.

Generally, they are sealed with steel chimbs for strength and security. These components are easily separated for recycling. Alternative designs are also available – for example, all-fibre drums, perfect for lighter weight products.

## **FEATURES**

- Lightweight And Performance
- Product Protection
- Easy To Fill And Empty
- Low Cost And Optimisation
- Customisation
- Easy Disposal
- Safety
- Process Continuity

## **BENEFITS**

- Low cost alternative to steel or plastic.
- Sustainable: paper, the main raw material, is a renewable resource.
- Lighter weight means lower transport costs and less manual handling issues.
- Suitable for solids, pastes and liquids, dangerous goods, high-value products.
- Can be stored outside (with liners and coatings added).
- Can be re-used, easily recycled and incinerated with lower energy use.

## **COMMITTED TO THE ENVIRONMENT & SOCIETY**

**The fibre drum is a perfect example of the circular economy in action. Fibre drums can be re-used, then recycled to manufacture new products.**

## **INDUSTRY APPLICATION**

- Master Packaging
- Bulk Drugs
- Dyes
- Fine Chemicals
- Wire Industries
- Pesticide
- Resin
- Food Products
- Printing Industry
- Automotive Gears

## **DG SETS 2030 SUSTAINABILITY TARGETS**

DG a global leader in industrial packaging products and services, announced today ambitious new sustainability targets, reinforcing the company's commitment to building a more sustainable and equitable future.

The broader sustainability focus for the company continues to be advancing a circular economy, reducing greenhouse gas emissions, and championing diversity, equity & inclusion initiatives.
